CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

ANNEXURE A4

SERVICE LEVEL INDICATORS

SERVICE LEVEL INDICATORS

1. INTRODUCTION

The purpose of the Service Level Indicators is to guide and document the expectations and requirements of the services to be rendered to the Tendering Institutions by the Service Provider.

This document may be used as the benchmark against which reviews and, as appropriate, modifications to the service provided by the Service Provider shall take place.

2. KEY PERFORMANCE INDICATORS

Key performance indicators (KPIs) are management tools designed to monitor supplier performance and help meet the goals, objectives and service levels of the contract.

The KPIs must help point you in a direction, improve performance levels, identify breakdowns in a process and are a driver of continuous improvement for more efficient and sustainable procurement processes.

KPIs should be relevant to your institution and should be simple to use. When developing the KPIs, no more than 10 (ten) should be enough. You don't want to become overwhelmed and find yourself serving the KPIs rather than having them serve you.

Following KPIs shouldn't be about hours of gathering data. If you are establishing your first KPIs, start with just a couple so that everyone can understand them and their purpose. You can always add more KPIs later.

2.1 How should you set up your KPIs?

- Before starting to establish KPIs, you should figure out what your stakeholders need and what are the institution's strategies and objectives for the future. It starts with meeting the management as well as other stakeholders.
- Look for ways the supply chain unit can help meet them, and then look for metrics that reveal your progress towards achieving those goals. There is no one-size-fits-all formula for all departments and the goals as well as the KPIs are most usually custom.

- Introduce the newly established KPIs to procurement employees as well as all the stakeholders. Everyone should be well aware about the metrics, the reporting as well as the goals of them.
- The metrics should then be signed off by management in order to maintain accountability, and later on they will be reported on in future progress meetings.

2.2 Major groups of KPIs

The goals of KPIs can be divided into five major groups according to their purpose: receive savings (Cost), increase quality (Quality), improve delivery (Delivery), timeliness of actions (Timeliness), improved transparency (Integrity) and improved productivity (Systems Productivity).

All groups are tightly bound together and it's important to understand that these are like an octopus: if you are setting up your KPIs from only one of the groups, you don't want to harm any of the others because it might decrease supply sustainability.

3. RANGE OF SERVICES

The Services rendered are reflected in the Scope of Work (Annexure A1 Paragraph 15).

4. MEASUREMENT CRITERIA

The following table lists a comprehensive number of Key Performance Areas and Indicators. The Tendering Institution must select the most relevant KPA and KPIs and include it in their contracts and quarterly and annual reviews of the contract.
